

1911 Original Popper

Nostalgia combined with new technology! The antique styling of the 1911 Original is reminiscent of the poppers used by American street vendors almost 100 years ago. It's a design that draws consumers in and looks great in a game room too. This model pairs old-fashioned flair with our newest innovations including side-hinged, anodized aluminum kettles and extruded side post construction. Available in either classic red or black & chrome.

1911 Original 4oz.

Pops 92 1-ounce servings per hour. Buy one for your home theater!

(Does not include old maid drawer or built-in warming deck.)

1911 Original 6oz.

Pops 113 1-ounce servings per hour. Space saver design fits in small areas. (red only)

1911 Original 8oz.

Pops 147 1-ounce servings per hour. Versatile size – great for retail.

Popcorn machine & cart sold separately

Three-year Warranty Program - All of our machines are covered with a three-year warranty - the best in the business.

Carts & Stands

Powder-coat finish and label style to provide an extra match to 1911 style poppers.

Small size exact fit for 4 oz. poppers.
Medium size exact fit for 6 and 8oz. poppers.

Carts Features and Function

- Integrated supplies storage in back
- Large area for custom artwork
- Commercial grade steel construction
- Easier access than the pedestal stand
- Greater mobility and extra convenience
- More visible for impulse sales and merchandising
- Chip resistant coating

Stands Features and Function

- Takes up less space. Perfect for corner locations
- Lower cost than wheeled cart, with more storage
- Two Inner shelves for integrated supplies storage
- Wrap around door design provides easy access
- Larger area for custom artwork
- Welded door hinges for strength and long life
- Magnet door latch
- Clean, more modern non-cluttered look
- Commercial grade steel construction
- Leveling feet for uneven floors

Features

High-output, Hard-coat Anodized Aluminum Kettle

Poppers feature high output, hard-coat anodized aluminum kettles for optimum performance and easy cleaning. We only use aluminum because it has the highest heat transfer rate of any approved cooking material. Then we hard-coat anodize the kettles to create a non-stick surface that's a snap to clean – just wipe with a damp cloth.

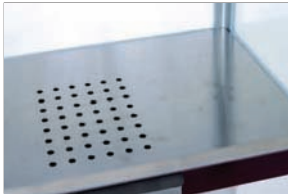

Side-hinged Kettle

Our side-hinged kettles are simple to operate and maintain. This design facilitates routine cleaning because you can reach all parts of the kettle. Just wipe it with a damp cloth regularly and you'll eliminate most of the baked-on carbon that is so common in oil-based cooking appliances. With less carbon build-up, your machine will heat faster and work more efficiently. Ordinary poppers with center pivot kettles build up baked-on carbon quickly and require time-consuming, difficult disassembly for cleaning.

Sturdy Cabinet Construction

Our cabinets feature aluminum extruded side post construction so they have superior structural integrity. The extrusions are designed to withstand heavy commercial use without damage. Channels inside the side posts protect wiring from oil residues that cause electrical shorts and operation interruptions. Tempered glass side panels slide right into the channels. All metal on the cabinet is finished with powder-coated paint that resists chipping.

Stainless Steel Foodzone and Tempered Glass Panels

The stainless steel bottom trays, drop doors and old-maid drawers are removable for quick cleaning. Just put them in the dishwasher or hand wash them with any mild detergent. Tempered glass side and back panels are designed for safety and easy cleaning – just wipe with a standard glass cleaner. (Old-maid drawers are not included on 4 oz. machine).

Built-in Warming Deck

Most of our poppers incorporate a 50-watt heating elements underneath the bottom tray. Since heat rises, bottom heating is better than heat lamps that only warm the top layer of popcorn. Our bottom-heating element keeps all the popcorn in the cabinet warm and at the ideal serving temperature. Depending on the humidity level, popcorn can stay fresh all day if kept at the right temperature. (50-watt heating element is not included on 4oz. machine).

Old Maid Drawer

A stainless steel drawer built into the base of the popper collects the unpopped kernels, or "old maids." The small holes in the tray allow the old maids to fall through, while keeping the fully popped corn in the serving cabinet. It's simple to remove the drawer for emptying and cleaning. (Old-maid drawers are not included on 4 oz. machine).

Presentation Lamp

A 50-watt R20 lamp lights the cabinet interior and highlights the popped corn for added impulse sales. The light also provides extra safety and convenience because the operator can see the kettle clearly for loading and unloading.
